

Slack Integration

Table of Contents

1. Configure Slack	1
2. Configure Taiga	1

Slack is a platform for team communication.

First things first, Slack is a huge platform with lots of features. Integration will always take time so please be patient. If you need a specific integration and you feel ready to get out your machete and start cutting into the taiga, please review our [API Docs](#).

If you need help with a specific feature, you can always get in touch with our community through our [mailing list](#).

1. Configure Slack

Go to your slack app

- Go to **Configure Integrations**.

[Slack Integration Step 1] | *imgs/slack-integration-1.png*

- Add a new "Incoming WebHooks" integration.

[Slack Integration Step 2] | *imgs/slack-integration-2.png*

- Choose a channel and click **Add Incoming WebHooks Integration**.

[Slack Integration Step 3] | *imgs/slack-integration-3.png*

- Copy your **Webhook URL**.

[Slack Integration Step 4] | *imgs/slack-integration-4.png*

2. Configure Taiga

In your project in Taiga:

- Go to **Admin > Contrib plugins > Slack**

[Taiga Slack Menu] | *imgs/taiga-slack-menu.png*

- Set the **Slack webhook url** to the copied value in the previous step.
- You can also set the Slack channel which your project will post to. Leave the field blank if you wish to post to the default channel.
