Changing elements status via commit message

Table of Contents

The status of any issue, task, user story or epic can be changed via commit message.

1. How?

Just add to your commit message something like:

```
TG-REF #STATUS-slug
```

- **REF**: US/Issue/Task reference of the element you want to modify

- **STATUS**: New status slug to set.

2. An example, please!

```
TG-123 #closed
```

In this example, **123** is an issue reference and with this command, the issue will change its status to **closed**.

3. And where're the available statuses defined?

If you are the project admin you can manage the statuses atribute in the admin pane: **Admin > Attributes > Status**. You can find all of them for stories, tasks and issues

[Manage Statuses inn the project admin panel] | *imgs/statuses_panel.png*
